Pattern Ideas

Some patterns require a 3/8” grout joint. Because of the square edge of Down to Earth, you may choose to use a tighter joint (1/4”) where applicable.

Colors

Down to Earth® colors and textures exhibit a great deal of range and character as a result of the natural materials used in our production process. Use a contrasting grout color to enhance the texture or a matching grout color to minimize it.

Sizes/Textures

Texture enhanced with a contrasting grout color.
(Sizes available in all colors - Textures specific to size)

4x8 with Velour Texture
Shown in 350 Red Paver
Grout color - Summer Wheat

6x9 with Stone Texture
Shown in 155 Cobblestone
Grout color - Sand Dollar

4x12 with Slate Texture
Shown in 255 Desert Floor
Grout color - Sable Brown

Indoor/Outdoor Tile for every climate

Rich color variation - captivating detailed texture - classic earth tones - traditional and unique sizing - combine to bring earth’s elegance to your home. Capturing the colors and textures of nature in the most natural of materials - Down to Earth® will add warmth to your living environment both indoors and outdoors.

Welcoming and inviting, traditional and at the same time contemporary, Down to Earth® brings commercial durability home with a flare!

Perfect for your outdoor porch, patio, walkway or pool surround.

Test Results

Down to Earth® meets ANSI Standards Specification A 137.1 and is classified as quarry tile. The exceptional technical characteristics enable D.T.E. to be used indoors and outdoors in any climate. D.T.E. is low absorption (3% maximum and qualifies as vitreous) and slip resisting. At time of manufacture, all D.T.E. colors have a dynamic coefficient of friction that meets or exceeds 0.60 wet. Please see our web site for complete testing data www.downtoearthtile.com.

Down to Earth® is a ceramic tile and must be installed over a substrate such as a cement pad using traditional thinset installation methods. Please consult the Tile Council of North America Handbook for complete installation instructions for tiling outdoors.

Please Note: Colors are as accurate as printed representations can be. For final color selection refer to current actual color samples.
