

THE LEADERS IN SLIP RESISTANCE

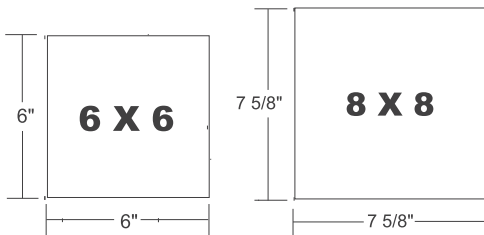

Metropolitan Ceramics' XA-Abrasive

quarry tile features silicon carbide embedded in the surface and a through-the-body metallic additive, creating a one-of-a-kind slip resisting tile with a Dynamic Coefficient of Friction (DCOF) rating of ≥ 0.70 .

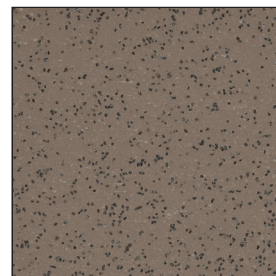

The silicon carbide embedded in the surface, along with the metallic additive throughout the tile, work together to resist the effects of spills, moisture, extreme temperatures and heavy traffic.

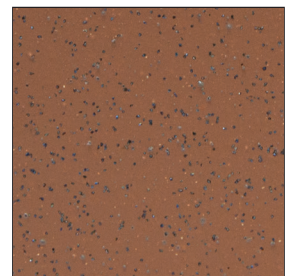

Use XA-Abrasive in the most demanding environments, both indoors and outdoors - anywhere durability and slip resistance are essential.

THE LEADERS IN SLIP RESISTANCE

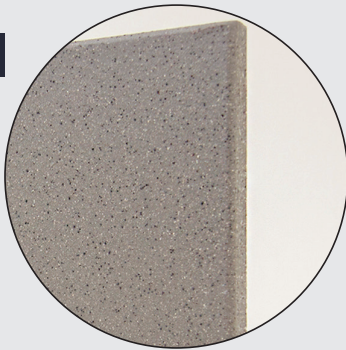

Metropolitan Ceramics' XA-Abrasive

quarry tile features silicon carbide embedded in the surface and a through-the-body metallic additive, creating a one-of-a-kind slip resisting tile with a Dynamic Coefficient of Friction (DCOF) rating of ≥ 0.70 .

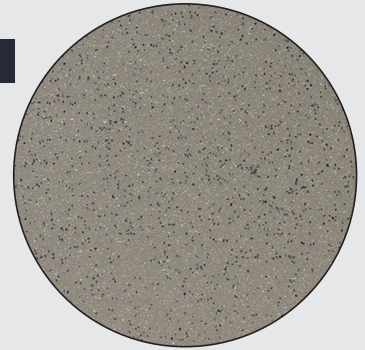

First Came X-Colors

With a metallic additive mixed through-the-body of the tile, QuarryBasics® X-Colors had been the standard-bearer of slip resisting ceramic tile for decades.

Then Came Abrasive

QuarryBasics® Abrasive was added in 2011 as a true silicon carbide embedded Abrasive tile with the slip resisting characteristics associated with silicon carbide.

Now it's XA-Abrasive

XA-Abrasive™ is the final evolution in slip resisting ceramic tile. XA-Abrasive combines the benefits of X-Colors' through-the-body metallic additive with QuarryBasics Abrasive's silicon carbide embedded surface for superior performance.

Use XA-Abrasive in These Areas

- Anywhere Slip/Fall Issues are a Concern
- Heavy Traffic Areas
- Areas Subject to Spills & Moisture
- Places With Extreme Temperatures
- Where Added Durability is a Must
- Indoors and Out in Any Climate

Metropolitan Ceramics and Slip Resisting Products

As the leader in manufacturing unglazed ceramic quarry tile, Metropolitan Ceramics knows something about making the most reliable, durable and slip resisting tile on the market. Metropolitan Ceramics products are used in the most demanding commercial applications throughout the United States.

Metropolitan Ceramics has always gone above and beyond, striving to manufacture ceramic tile with even more slip resistance, first with the introduction of X-Colors over thirty years ago, and followed by the QuarryBasics Abrasive line of products.

Now Metropolitan Ceramics offers XA-Abrasive as the latest innovation in combating slip falls. By combining the qualities of both X and Abrasive into one slip resisting tile, Metropolitan brings to market a truly one of a kind ceramic tile that is unlike anything else available.
